Summary

AWS DevOps Engineer with **2+ years** across cloud monitoring, infrastructure automation and SRE. Cut release cycles from **weekly to daily**, reduced infrastructure provisioning time by **80%**, and maintained **zero critical security findings** through automated compliance controls. Dual AWS-certified (Solutions Architect and Data Engineer, Associate). Builds with Terraform, Jenkins, Prometheus and Grafana, and works closely with DevOps, SRE and application teams.

Experience

AWS DevOps Engineer

Tata Consultancy Services (TCS), Hyderabad · June 2024 – Present

- Built a centralized Prometheus and Grafana monitoring platform giving real-time visibility into infrastructure health across multiple Linux servers and cloud environments.
- Automated monitoring infrastructure with Terraform (Prometheus, Grafana, Node Exporter), enabling consistent, version-controlled deployments and cutting provisioning time by 80%.
- Integrated Jenkins CI/CD pipelines with the monitoring stack to validate post-deployment health and alert on failed builds, moving releases from weekly to daily.
- Configured Node Exporter, Prometheus scrape jobs, service discovery, recording rules and alerting rules to track CPU, memory, disk, network and system load.
- Developed Grafana dashboards with PromQL covering server availability, application health and resource utilization.
- Integrated Alertmanager with Slack and email, tuning thresholds, grouping and deduplication to reduce alert fatigue and lower Mean Time to Detect (MTTD).
- Monitored EC2 instances, Linux servers and Docker containers; performed proactive capacity planning and resolved exporter, scrape and connectivity issues.
- Applied AWS Well-Architected Framework practices across reliability, security, cost, performance and operational excellence in monitoring and infrastructure design.
- Authored runbooks, SOPs and dashboard guides for monitoring and incident response, improving knowledge transfer and reducing onboarding time.
- Partnered with DevOps, SRE and application teams to set monitoring standards and speed up root cause analysis during incidents.

Skills

Cloud (AWS): EC2, S3, Lambda, RDS, ECR, EKS, Auto Scaling, SNS, CloudWatch, VPC, Route 53, ALB/NLB, CloudFront, IAM, KMS, Secrets Manager, WAF, GuardDuty, Security Hub, AWS Config, CloudTrail

IaC & CI/CD: Terraform, CloudFormation, Ansible, Jenkins, GitHub Actions, AWS CodePipeline, Git, GitHub, GitLab, GitOps

Containers: Docker, Kubernetes, Amazon EKS, Helm

Monitoring & Observability: Prometheus, Grafana, PromQL, Alertmanager, Node Exporter, CloudWatch, Dynatrace

Languages & Systems: Python, Java, Bash, Shell Scripting, Linux (Ubuntu, Amazon Linux), MySQL, PostgreSQL

Practices: DevOps, SRE, Incident Response, Disaster Recovery, Cloud Security, Technical Documentation

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03) · Amazon Web Services · 2026

AWS Certified Data Engineer – Associate (DEA-C01) · Amazon Web Services · 2026

Education

B.Sc. Computer Science

Sri Aditya Degree College, Ambedkar University, Srikakulam · June 2020 – August 2023 · 77.40%
